

JUNGSU HWANG

Seoul, South Korea | harveylew8@gmail.com | GitHub | LinkedIn

EDUCATION

Korea University, Seoul, South Korea	Mar. 2022 - Feb. 2028 (Expected)
B.S. in Computer Science and Engineering GPA: 4.26/4.50	
The University of Texas at Austin, Austin, TX, USA	Spring 2027
Incoming Exchange Student	
Relevant Coursework: Operating Systems, Computer Architecture, Computer Networks, System Programming, Internet Protocols, Artificial Intelligence	

RESEARCH EXPERIENCE

Systems for Extended Reality and AI Lab (SERA Lab), Korea University	Jul. 2026 - Present
Undergraduate Researcher Advisor: Prof. Seyeon Kim	
Researching memory-efficient LLM serving across server GPU, NPU, and mobile platforms, with a focus on inference acceleration under memory constraints and platform-specific compute/data-movement bottlenecks.	
System Software Lab, Korea University	2025 - Jun. 2026
Undergraduate Researcher Advisor: Prof. Gyeongsik Yang	
- Explored GPU scheduling for AI serving in serverless environments, focusing on efficient GPU sharing and resource utilization across workloads. - Studied AI-and-RAN systems that share accelerated computing infrastructure between wireless network processing and AI workloads.	

RESEARCH INTERESTS

AI Systems • Networked Systems • Mobile/Edge Systems • LLM Serving

TECHNICAL SKILLS

Programming	C, C++, Python
Systems & ML	CUDA, PyTorch, llama.cpp, Linux
Accelerators	Qualcomm QNN, Hexagon NPU
Tools	Git
